SPECIFICATION AMENDMENT

In response to the examiner's objection to informalities on page 6, replace the last paragraph on page 6 with the following rewritten paragraph to correct the spelling of siderophores and through

The present invention demonstrates the ability of heme compounds, siderophores, polysaccharides and peptides to bind to pathogenic microorganisms and their proteinaceous toxins; taxoromic identification of a microorganism is attained through analysis of the number and kind of ligands to which it binds. The development of this method was done to overcome the aforementioned limitations of antibody-based technologies. The concept of the present invention resides in a method for the taxonomic identification of microorgan sms in which microbes are captured through the binding of microbial receptors to specific ligands. A microorganism-containing sample is contacted by the ligand, with the ligand being either --
